The first 40 x 150 HP Case steam engine was developed and built at the J. I. Case Threshing Machine Company Engine Works at Racine, Wis., in late 1904. This was not designated as a Road Locomotive (R. L), but was called a 'Sample,' or experimental engine.

#### The Legendary 150 HP Case Steam Traction Engine - Steam ...

Once a beloved piece of Chris Busch's collection, this 1911 Case 30 HP Steam Engine, also known as No. 24491, rose to fame in the 1950s. Chris Busch—one of the earliest giants in the steam engine-collecting community—began accumulating these machines after noticing the alarming rate at which steam engines were being scrapped.

#### 1911 Case 30 HP Steam Engine - Mecum Magazine - Tractors

ANY decent running engine should cost \$35 to 40K. Now add in rarity, desirability (really big or small) and provenance (history) you can see that Case steam tractors have really not risen to nearly the levels they might. I do not think there where ever be a time where you will not be able to operate a steam engine.

#### Case steam traction engines for sale

J. I. Case Steam Tractor Number 26701 was built in 1912. It has a 75 hp, single cylinder, double acting steam engine. It was shipped by rail to the J. I. Case dealer in Billings, Montana. The dealer did not sell it immediately so he leased it for plowing and threshing in the fall of 1912 season.

#### Case Steam Traction Engine Dyno - YouTube

The 150 Horse Power CASE steam engine is somewhat like the story of the Titanic. It was built as the largest steam traction engine of its time, but all we have left are the stories and a few pictures. Ever since I was a little boy listening to the stories George Hedtke would tell about this great engine I was fascinated by it.
