Getting Started with MariaDB - MariaDB Tutorial

Getting Started with MariaDB using Docker, Python and Flask. April 29th 2020. Since being forked from MySQL back in 2009, MariaDB has become one of the most popular databases of choice for developers over the past decade. While many technologists have likely gravitated to it as a solution due to its open source roots and that it's rooted in the relational database world, that really only

Getting Started with MariaDB using Docker, Python and ...

The primary place for MariaDB specific documentation is the MariaDB Knowledge Base. If you have MariaDB already installed you can also read the man pages. Every binary in MariaDB has a man page. To view a man page simply run on the command line man followed by the command/binary name, for example man mysql.

Documentation - MariaDB.org

```
INSERT INTO authors (name_last, name_first, country) VALUES('Kafka', 'Franz', 'Czech Republic');
```

This will add the name and country of the author Franz Kafka to the authors table. We don't need to give a value for the author_id since that column was created with the AUTO_INCREMENT option. MariaDB will automatically assign an identification number.
