The Sony a6600 sits atop Sony's line of APS-C sensor cameras, offering impressive features borrowed from their acclaimed a7 series (such as 5-axis image stabilization and Eye AF) in an even more compact body. Like with the ZV-1, Sony has built the a6600 to allow unlimited clip recording length, making it much more useful if you need uninterrupted video of longer events.

The inetd(8) daemon is sometimes referred to as a Super-Server because it manages connections for many services. Instead of starting multiple applications, only the inetd service needs to be started. When a connection is received for a service that is managed by inetd, it determines which program the connection is destined for, spawns a process for that program, and delegates the program a socket.
