Introduction. The use of peritoneal dialysis (PD) for renal replacement therapy varies widely in different regions of the world and in individual countries.<sup>1</sup> In economically developed countries, the choice of PD versus hemodialysis is sometimes a matter of patient preference and sometimes due to lack of a hemodialysis unit that is easily accessible to the patient's home.

Epidemiology. SLE is a chronic inflammatory disease that can affect any organ, but very often injures the kidney. SLE is more prevalent in women than men across all age groups and populations; the female-to-male ratio is highest at reproductive age, ranging between 8:1 and 15:1, and is lowest in prepubertal children at about 4:3 (1-3). The prevalence of SLE and the
