Theoretical foundations and analysis. Logic plays a fundamental role in computer science. Some of the key areas of logic that are particularly significant are computability theory (formerly called recursion theory), modal logic and category theory. The theory of computation is based on concepts defined by logicians and mathematicians such as Alonzo Church and Alan Turing.

Computation tree logic (CTL) is a branching-time logic, meaning that its model of time is a tree-like structure in which the future is not determined; there are different paths in the future, any one of which might be an actual path that is realized. It is used in formal verification of software or hardware artifacts, typically by software applications known as model checkers, which determine ...

1. Introduction. With the rapid development of technology, traditional cities are becoming smarter. The components of a smart city include smart mobility, smart living, smart environments, smart economy, smart governance, and smart people (Khatoun and Zeadally, 2016). Smart mobility is a crucial factor in smart cities.

Abstract A significant and growing literature on international relations (IR) argues that domestic politics is typically an important part of the explanation for states' foreign policies, and seeks to understand its influence more precisely. I argue that what constitutes a “domestic-political” explanation of a state's foreign policy choices has not been clearly elaborated. What counts as a ...

Choices made by individuals, small groups, or coalitions representing nation-states result in policies or strategies with international outcomes. Foreign policy decision-making, an approach to international relations, is aimed at studying such decisions. The rational choice model is widely considered to be the paradigmatic approach to the study of international relations and foreign policy.

Abstract Overwhelming evidence shows the quality of reporting of randomised controlled trials (RCTs) is not optimal. Without transparent reporting, readers cannot judge the reliability and validity of trial findings nor extract information for systematic reviews. Recent methodological analyses indicate that inadequate reporting and design are associated with biased estimates of treatment ...
