The System. Playdate is familiar, but unlike anything you've ever seen. It has a very special black and white screen – not backlit, but super reflective – that looks way more amazing than you're probably imagining... It also has a peppy little processor, Wi-Fi, Bluetooth (coming soon), and a surprisingly loud loudspeaker.

Playdate

[on his movie The Butterfly Effect (2004)] I thought that it was a fantastic metaphor for life, and pretty enlightening. And I appreciated the opportunity to play a character that's blind to the trauma that takes place in his life. The violence that is in the movie I thought was a fantastic metaphor for how blind we are as a society, and as a people, to the things that actually do happen on a ...

> Normal brains are constantly ignoring small prediction errors and are very tolerant of ambiguous, uncertain, or new situations. An ASD brain cannot blend in the minor mistakes as well, so it spends a lifetime perpetually surprised and overstimulated by every event that is even slightly unpredictable, and is fairly intolerant of ambiguous, uncertain, or new situations.
